

Monday 5<sup>th</sup> October

LI: To use language related to the growth of humans.

C: Ordering.

Place the pictures in order of human growth from the beginning and label each stage of growth

My baby teeth are falling out. I am getting bigger, stronger and smarter because I go to school now.

I am not able to do anything on my own yet. I drink milk. I cannot walk or talk yet.

I do most things on my own now. I might be moody at times. New hormones help me to grow and change.

I have recently learnt to walk and talk. I am also starting to try different food. I need help a lot still.

I am not as strong as I was. My joints and muscles sometimes ache. My hair has turned white and my skin has gone a little wrinkly.

I am fully grown now and I take care of myself. It is important to me to exercise and eat healthily.

Challenge – Match the description to the picture of the correct life stage.
