

LI: To understand pitch

Try to find two different things in your house that make different sounds to explore how they make sounds of different pitch. This could be a used butter carton with an elastic band over it.

For each instrument, write the name, draw and label a diagram and explain how the different sounds are made.

<u>Instrument 1: Name</u>		
<u>Diagram</u>	<u>Observation:</u> Think about how the instrument makes the different sounds	
	<u>How did you make a high sound?</u>	
	<u>How did you make a low sound?</u>	

<u>Instrument 2: Name</u>		
<u>Diagram</u>	<u>Observation:</u> Think about how the instrument makes the different sounds	
	<u>How did you make a high sound?</u>	
	<u>How did you make a low sound?</u>
