

LI: To identify reversible and irreversible changes

C: Everyday items

Fill in the Prediction part of the table thinking about what would happen to each of the items if they were heated.

If you already know what will happen (because you have already tried it or seen it), then explain what happened in the Actual box.

If you have not seen it, ask an adult to complete the heating of the item with you and observe what happens.

Finally, complete the final box, deciding if the change is reversible (able to be changed back to how it started).

Food	Change when heated		Is the change reversible? Yes or No
	Prediction	Actual	
Margarine			
Egg			
Crisp			
Ice			
Chocolate			
Bread			
Water			

Use these words to help you: melt, toast, burn, change colour, cook
