Parkgate Primary School... Garden – Eco News..... Summer Term 2019.....

In this edition we have an update on what has been growing around the classes and in the areas where the gardening club have been working and some news on the exciting plans for the late part of the summer and into September. Read on......

Rocket potatoes making lots of growth.....

Potatoes..... Growing well....

Broad beans in flower......

Peas look good.....

The peas that were sown by the gardening club children have produced a crop of peas......

Here you can see the pea pods are swelling up fast to give us some super sweet peas......

Flower seeds sown at the school frontage.....

The gardening club children have been busy sowing flower seeds at the school frontage which when they flower will add some more colour to the school entrance, plus the seeds that have been sown will all self-seed so there will be flowers year after year. These flowers are poppies, Californian poppies and cornflowers...... Below you can see these plants are growing well.....

Lavender looking good!

Grass growing well

Rocket potatoes being dug up.....

Rocket seed potatoes that have all been dug up and shared out with all of the gardening club children...... **Freshly dug potatoes.....**

Pumpkins finally starting to make some growth.....

With the unpredictable weather that we have experienced over the last month or so, our pumpkin plants have been slow to make any significant growth but they have started to make some strong growth – lots of water and sunshine is the secret to pumpkin growing – there is still time to get a big pumpkin growing...... Below you can see our pumpkin plants.....

Big school developments ahead.....

Haygrove Poly Tunnel installation taking shape.....

Potting benches installed inside the poly tunnel.....

The poly tunnel has three potting benches all installed – a great teaching resource.....

The basic poly tunnel installation is completed – three potting benches are set up, on both of the sides is guttering to capture rainwater – we need to set up our water butts next. Also, you can see the start of the raised bed set up and the pathways that will be covered in bark chippings making a safe all-weather surface.

Raised Bed set up has started.....

More raised beds.....
